

Dated 25th July 2026

TO WHOM SO EVER IT MAY CONCERN

This is to certify that Mr. shubham kushwaha has successfully completed his six-week remote internship as a Data Science Intern with Colourbar Communications, from June 1, 2025, to July 13, 2026. During his tenure, he was an integral part of the Artificial Intelligence (AI) department.

During the internship, Mr. shubham kushwaha actively contributed to the "Potential Client Analysis and Automation" project. His primary focus was leveraging data-driven strategies to identify high- value clients and engineering automated workflows to enhance organizational decision- making and operational efficiency.

Key Contributions and Achievements:

- **Data Management:** Executed end-to-end data extraction, cleaning, and pre-processing from diverse internal repositories to build comprehensive client profiles.
- **Exploratory Analysis:** Conducted detailed Exploratory Data Analysis (EDA) to uncover critical market trends, behavioural patterns, and key drivers of client acquisition.
- **Predictive Analytics:** Developed and deployed machine learning algorithms to score, rank, and segment potential client leads based on dynamic business parameters.
- **Workflow Automation:** Authored robust Python scripts and automated data pipelines, significantly optimizing the client scoring workflow and minimizing manual processing time.
- **Data Visualization:** Designed intuitive, interactive dashboards to communicate complex analytical insights to cross-functional stakeholders effectively.

Throughout his time with us, Mr. shubham kushwaha demonstrated exceptional analytical aptitude, advanced problem-solving skills, and a practical mastery of core data science principles. His dedication and technical contributions were highly valuable to the team's success.

We extend our sincere appreciation for his efforts and wish him the very best in his future academic and professional pursuits.
